News from Eritrean Kunama ancestral land

An extremely dangerous round up has taken place in the Eritrean Kunama Land (Gash barka region). The round up was carried out in the four sub regions of the Eritrean Kunama land (Gash-barka). At the fourth week of December, the scheduled round up has extended to the Sudanese border of Hamdayet village from which several Eritreans, including more than ten Kunama nationalities were herded to prison. Further, another round up is taken place on 09/01/2015 at the Shambakko sub zone where there were repeated shot outs and chasings. In the past months, the regime has trained and called up all the local militias to Dokinbiya, trained two regiments, the 18th and 57th which are presently stationed around the Barentu air port and ordered to dig trench respectively. The entire and over all plan is to unseat Eritreans to think for a better alternative than the PFDJ regime.
